

## Scope

**Rocky Stone Refresher** is a care product for refreshing oiled or oiled/waxed open-pored natural stone, screed and exposed concrete surfaces in interiors.

## Properties

Antistatic, silky gloss, quick to polish, high cleaning power.

## Composition

Pure vegetable oils, valuable balsamic resins, oils, natural waxes, lead-free dry substances.  
Read our full declaration.

## Preparation

Clean the substrate with **Rocky Stone Cleaner** 1 day before application.

### The surface must be clean and dry.

Processing and soil temperature must be at least 15°C / 50-60% relative humidity.

It is essential to switch off the underfloor heating at least 2-3 hours before the start of work. 12-24 hours after the last treatment, restart it with a flow temperature of 25-30°C.

## Processing - Care

Apply drop by drop to the surface. Then massage into the surface with a soft cotton cloth. In the floor area, **Rocky Stone Refresher** can be polished with a single-disc machine and white pad. After polishing, the surface must be dry to the touch, as protrusions can remain sticky and shiny.

## Processing – Cleaning

Older floors often have a "gray haze" that can no longer be removed by normal cleaning.

Here, **Rocky Stone Refresher** can be used not only as a refresher but also for cleaning.

The preparation must also be adhered to here as described.

Apply **Rocky Stone Refresher** generously to the surface and massage into the surface with a brown cleansing pad. Processing larger areas with a single-disc machine. (Caution: splashes can contaminate the walls in the edge area!)

The dirt is loosened and removed from the surface with the oil. Wipe dirty oil off the surface with a cloth or spatula. Repeat the process if necessary. When cleaning is finished, wipe off the excess oil well. Polish the surface again with a dry polishing cloth.

## Consumption

with maintenance: 50-100 m<sup>2</sup> / lt  
during cleaning: 5-10 m<sup>2</sup> / lt

## Drying

Gently walkable after 4-8 hours.  
Thoroughly dried after approx. 12 hours

**Ventilate well!** In the first week, ensure good room ventilation (otherwise odor problems could occur) and only dry clean the surface.

## General

Wipe away stagnant water from the surface as quickly as possible, use a waterproof base for flowerpots, otherwise stains may appear.

## Storage

Store this natural product in a cool, well-sealed place out of reach of children. Empty the container completely and recycle it.

## Specifications

Flash point: over 65°C

Packaging: 0.25 lt / 1 lt / 5 lt

**For optimal results, we recommend the ROCKY STONE CARE program:**

**Rocky Stone Oil, Rocky Stone Refresher, Rocky Stone Cleaner, Rocky Stone Wax**

**ATTENTION!** Be sure to keep the oil-soaked rags closed (tin can), hang cloths over a large area or wash them out with **Rocky Stone Cleaner**. These could ignite themselves due to the drying vegetable oils!

## Safety advice

Do not fill the liquid product into food, drink or other containers intended for food or feed, and keep away from children. Natural raw materials can cause allergic reactions. The thoroughly dried paint is harmless to humans, animals and plants. Request safety data sheets if required.

## General information about Natural Naturfarben

Natural paints are produced in the sense of a holistic approach to the problem of colors and the environment. The raw materials come from a closed ecological cycle and, later as waste, are reintegrated into it without leaving any residue.

All ingredients are tested according to building biology criteria and processed into paints and pigments using gentle, waste-free technology.
